

HEALTH AND DENTAL EXAMINATION REQUIREMENTS PLAINFIELD SCHOOL DISTRICT 202

District 202 Health Services welcomes you and your child as he/she begins senior year!

The Illinois School Code Sec 27-8 requires all 12th grade students to have two Meningococcal Conjugate (MCV4) vaccinations completed prior to the first day of school. The first MCV4 vaccine should have been received on or after your child's 11th birthday. The second dose must be received on or after your child's 16th birthday. If the **first** dose was received **after** the 16th birthday, then only one dose is required for 12th grade. The minimum interval between the two vaccines is 8 weeks.

Please note the Meningitis B vaccine does **NOT** satisfy this requirement. Your student must receive the Meningococcal Conjugate vaccine (MCV4) to comply with Illinois School Code.

Proof of vaccination must include your child's name, vaccination administrators, date given, and signature of the health care provider. Please submit all documents to the health office by August 1st.

All paperwork is due to the health office by **August 1st**. Any students who are not in compliance with the immunization/exam requirements by August 1st will have the following restrictions:

- Students will not be able to view their class schedule online until they are compliant
- Students could be dropped from courses
- Students not in compliance by the first day of school will be excluded from school until the required documentation is submitted to the health office.
