

Tone Words and Definitions

Tone is more than merely an author's attitude toward his/her audience and characters; it is the stylistic means by which an author conveys his/her attitude(s) in a work of literature.

Tone is an integral part of a work's **meaning** because it controls the reader's response which is essential to fully experiencing literature and understanding rhetoric. **To misinterpret tone is to misinterpret meaning.**

In order to recognize **tonal shift** and to interpret **complexities of tone**, the reader must be able to make inferences based on an active reading of the work. The author's tone is revealed by organization, choice of detail, and sentence structure or syntax, but **word choice** is probably the strongest indicator of tone.

*Directions: Familiarize yourself with the denotations and connotations of the following **tone words**. This is by no means a comprehensive list! You should also practice utilizing adjective and adverb forms of each word:*
