Front Elevation

Revit to Finish

- Mixed Use Building (Commercial + Residential)

You will combine a commercial space in the first floor of a structure with a residential space on the second floor. The second story will house a town house with a minimum of two bedrooms. This is a luxury home and should contain luxury features as such. There is not a square footage requirement for either space, but the project must be in the building site dimensions.

- 1- Identify your commercial space
- 2- Building site = 34' x 76'
- 3- Be sure you are considering how the business operates from the standpoint of accessibility
- 4- Stairs must be accurately sized
- 5- If it is a restaurant it must have outdoor seating\
- 6- The town house must have outdoor space
- 7- Commercial Space 12' Ceilings Minimum – Residential 10' ceilings minimum

Max – 5-Guys
Kionte – Coach
